

Project Exhibition- “SRIJAN”:

Objective: To provide the platform to work on innovative ideas of projects and developing the prototypes or models. This event also showcases the potential of practical knowledge of the students.

Activity: The students were trained for hands-on practice on various latest technologies like Arduino, Raspberry pi, ATMEGA 2560 etc. by experts. The open source tools were used for completing such models.

Outcome: Students are able to express themselves through project demonstrations and also disseminate their learning to others. On completing such kind of event, students learned to work on various platforms like Arduino, AVR, Raspberry Pi, fire bird V & Spark V kits etc. They also worked on hardware of the projects like soldering, PCB designing etc. The students also represented their projects to various dignitaries present at the event hence enhancing
